

Models 20 & 30

General Purpose Impulse Heat Sealers

Model 30: Pneumatic Impulse Sealer

Our pneumatic jaw pressure sealer is the best all around bag sealer on the market and our top model for volume production. It combines performance with value in a machine that adjusts for most film sealing situations. The system is equipped with high quality components including an electric foot switch that allows a single operator to easily and safely activate the sealing process. An external air supply is required.

Reliability

The **Model 30** can be relied on to produce a quality seal every time, even when using mil-spec films that demand consistent heat and pressure.

Easy Portability

The ergonomically designed Accu-Seal 30 can handle your toughest job yet, at 26 lbs, it's the lightest sealer on the market. You might need a forklift to move other sealers, but with the Accu-Seal 30, *pick it up and go!*

Model

Model

Model 20 : Manual Impulse Sealer

This portable heavy-duty bag sealer is the machine we most often recommend when a manual, yet rugged bag sealer is needed. This portable tabletop unit can be used for low volume production as well as situations that require heavier film thickness. The **Model 20** sealer can also be used with a mechanical foot pedal, offering hands-free operation for an easy, convenient way to seal.

Two-Year Limited Warranty

We are confident with the quality and reliability of our products and offer a Two-Year Limited Warranty for most Accu-Seal machines. For further details please contact the Accu-Seal sales department. Accu-Seal machines are designed and manufactured with pride in the USA.
